

Travel Technology Products And Solutions Provider

The world's first **real-time hotel mapping and descriptive content delivery system**. A patent-pending technology solution aimed to resolve the inconsistent distribution of hotel content across major hotel content providers.

Unified master hotel database to avoid duplication of content, where each hotel property aggregated carries a unique hotel ID along with the hotel IDs sent by suppliers.

QC routine checks ensure accurate and up-to-date hotel content for end customers on travel websites, by automatically segregating good content from the bad.

Single API for hotel content downloaded from multiple suppliers enables travel businesses to increase coverage, to be able to offer more hotels to end customers.

Stay up-to-date at all times with clarifi content sync-bots which continuously search its servers for any hotel content updates and tracks the smallest of changes.

Customize hotel descriptions and keep end customers informed as clarifi enables users to add and edit the availability of amenities offered by hotels.

Amplify your user experience with high-definition images of hotels and add to the aesthetic appeal of travel booking websites quickly, for a rich user experience.

Reports and notifications along with system alerts summarizing hotel content updates, customizations, de-duplications and errors corrected in the master database.

Run marketing campaigns on specific hotel properties, offering greater margins. Add promotional content to hotel descriptions and attract travelers to book hotels.

About Us

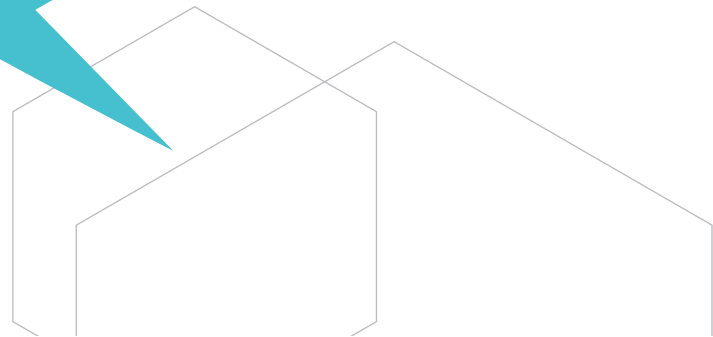

Tavisca Solutions, a travel technology products and solutions provider that works with (B2B, B2C and B2B2C) travel companies across the globe and helps them enhance their online business. With the vision to build future-focused technology building blocks that solve key challenges in online travel business, tavisca® offers a versatile suite of cloud-based SaaS products, deciphering every aspect of customer and agent facing booking engines, travel mid & back-office operation management systems.

Established in 2008, tavisca® has emerged into a team of travel technology specialists with over 300 dedicated personnel and three state-of-the-art development centers in India and the United States of America.

Today, tavisca® continues to soar at its position amongst the top 100 'GPTW' list of best places to work in India, for three consecutive years.

tavisca's core offering 'travelnxt' is a PCI PA-DSS compliant online travel booking management software that works across Air, Hotel, Car, Deals, Activity/Transfers and Insurance with a Strong Booking Engine, Static Package Builder and Inventory Management System. Annually, tavisca's travel technology empowers more than a million online travel bookings globally.

A Travel Technology products and solutions provider that works with (B2B, B2C and B2B2C) travel companies across the globe.
